## Sub notes:

- i) Under Indian GAAP, proposed dividends are recognised as liability in the period to which they relate irrespective of the approval of shareholders. Under Ind AS, proposed dividends is recognised as liability in the period in which it is declared (approval of shareholders in general meeting) or paid.
- ii) Under Indian GAAP, any escalation in operating lease rentals were straight-lined over the lease term. Under Ind AS, operating lease rentals are not straight lined over the lease term if the payments to the lessor are structured to increase in line with expected general inflation.
- iii) Under Indian GAAP, in respect of purchase of goods at prices that are yet to be fixed at the period end, adjustments to the provisional amounts invoiced by the vendor are recognised in the cost of inventory based on the closing gold rate. Further, in respect of purchase of goods whose prices are fixed at forward rates, cost of inventory is measured at such forward rates. Under Ind AS, in respect of purchase of goods at prices that are fixed subsequent to the date of purchase, the Company has applied hedge accounting wherein the option to fix prices is designated as a hedging instrument and change in fair value of inventory attributable to change in prices between the date of purchase and the date of fixing prices or reporting date (as applicable) is designated as hedged item. The hedging relationship is considered a fair value hedge. The gain or loss on the hedging instrument is recognised in statement of profit and loss and the corresponding gain or loss on the hedged item is adjusted in the carrying amount of the hedged item and recognised in statement of profit and loss. Under Ind AS, financial liabilities in respect of purchase of goods whose prices are fixed at forward rates, are measured at amortised cost, as explained in (v) below
- iv) Under Indian GAAP, current investments were stated at lower of cost and fair value. Under Ind AS, these financial assets have been classified as Fair Value Through Profit and Loss (FVTPL) on the date of transition to Ind AS and fair value changes after the date of transition have been recognised in the statement of profit or loss.
- v) Under Indian GAAP, the financial assets and financial liabilities were typically carried at cost. Under Ind AS, certain financial assets and financial liabilities are initially recognised at fair value and subsequently measured at amortised cost which involves the application of effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of the financial asset or financial liability. For certain financial assets and financial liabilities, the fair value thereof at the date of transition to Ind AS has been considered as the new amortised cost of that financial asset and financial liability at the date of transition to Ind-AS.
- vi) Under Indian GAAP, foreign exchange derivatives used for hedging purposes were restated at each balance sheet date, and the premium was amortised over the term of the forward contract. Under Ind AS, all derivatives are measured at FVTPL and mark-to-market gains or losses are recorded in the period when incurred.
